---

For ML02 the units went down at midnight for both collocated units. It must have been an overall power failure. This is attached.

For ML03 We have all the data from Viper which is attached in raw format but the readings are every 10 seconds so there are 6 times the amount. The file is quite big and in a different format than we get from the ProRae downloads. We have worked a process today for processing this data and will be more timely on the next delivery that we use the VIPER data with. This is very large. I will send it separately.

For ML04 the unit dies at 3 AM and there is not a Viper instrument located with it taking readings. This is attached.

Over the weekend Matt Hansen will be processing the data. Please keep him and I on all emails.

Summary report next.

**To:** Parnell, Heth; Hansen, Matthew  
**Subject:** RE: Data 20130412

ML02 punked out at midnight

ML04 punked out at 3AM but there is no viper data for it. That sound right?

Will you be sending ML03?
